Účastníci souhlasí s případným zveřejněním svých vystoupení na internetových stránkách Senátu.

Simultánní překlad je zajištěn.

DR. CHALOUPKA is a research professor in the Division of Health Policy and Administration of the University of Illinois at Chicago School of Public Health. An economist internationally recognized for his study of the economics of tobacco control, he directs IHRP's Health Policy Center. He is also a research associate at the National Bureau of Economic Research's Health Economics Program and

Program on Children.

From 1997 to 2016, Dr. Chaloupka co-directed, with Lloyd Johnston of the University of Michigan, Bridging the Gap, a interdisciplinary national research program funded by the Robert Wood Johnson Foundation. That program contributed substantially to the scientific understanding of the influences of policy, programs, and environment on youth, and influenced federal, state and local policy initiatives to improve the health behaviors of children and adolescents.

He is a recipient of the World Health Organization's 2014 World No Tobacco Day Award, the 2011 John Slade Award of the Society for Research on Nicotine and Tobacco and, with Geoffrey Fong, PhD, of the University of Waterloo, the 2015 Luther Terry Award for Outstanding Research Contribution. He is the principal investigator of Tobacconomics, economic research that informs tobacco control policy.

He served on the Institute of Medicine committee on Leading Health Indicators for Healthy People 2020, and the ad hoc National Research Council Committee on the Illicit Tobacco Market, which wrote this report. Previously, Dr. Chaloupka also served on the IOM committee that wrote Bridging the Evidence Gap in Obesity Prevention: A Framework to Inform Decision Making. He also contributed as an editor and author to the 2012 Surgeon General's Report, Preventing Tobacco Use Among Youth and Young Adults and the 2000 Surgeon General's Report Reducing Tobacco Use. He also coauthored the World Bank Report Curbing the Epidemic: Governments and the Economics of Tobacco Control

Dr. Chaloupka received his doctorate in economics from the City University of New York Graduate School in 1988.

ANCA TOMA FRIEDLAENDER was appointed Director of the Smoke Free Partnership in 2018, having previously served as Director of Communications and International policy, and Senior Policy Advisor. Since March 2012 she supported SFP with its positioning and involvement in the European and global tobacco control policy debates, with a particular focus on the revision of the

Tobacco Products Directive, the implementation of measures to safeguard health policymaking from tobacco industry interference, and the coordination of national and European campaigns.

Previously, Anca was a consultant in public affairs and communications, providing strategic advice to companies, EU agencies and non-governmental organisations on EU health policy and advocacy, developed and coordinated the implementation of lobbying strategies on various health areas including tobacco control and smoking cessation. Between 2002-2005, she was an advisor to the Romanian Chief Negotiator with the EU, working on communications and media relations and coordinating the preparatory work for accession conferences.

Anca holds a degree in Political Science from the University of Bucharest and a Master's degree in European Politics and Administration from the College of Europe in Bruges.

HANA ROSS earned her B.A. and M.A. at the Prague School of Economics. In 2000, she received her Ph.D. in Economics from the University of Illinois at Chicago. She has over nineteen years' experience in conducting research on the economics of tobacco control and in management of research projects in low- and middle-income countries,

including projects funded by the World Bank, the World Health Organization, the Rockefeller Foundation, the Open Society Institute, the Robert Wood Johnson Foundation, the European Commission, the Bloomberg Global Initi-

ative, and the Bill & Melinda Gates Foundation. Dr. Ross published more than 80 articles and independent reports on issues related to tobacco taxation, cigarette prices, costs of smoking, illicit trade, youth access laws and other economic aspects of tobacco control. Her current research projects focus on the economic impact of tobacco control interventions in Africa, South East Asia, and in the European Union. She is also interested in the economic impact of risk factors associated with non-communicable diseases such as obesity, lack of physical activity, and alcohol consumption. Dr. Ross currently supports several research capacity building projects primarily focusing on Africa and Asia.
